

To whom it may concern,

NanoLumens is proud that our NanoSlim, NanoCurve and NanoWrap products are designed and built here in America, by Americans! We are Veteran owned, and approximately a third of our team are US Military Veterans. In an industry largely dominated by Asian companies, we boldly carry the Stars and Stripes high!

These products also qualify for the Buy American Act (BAA - 41 U.S.C. §§ 8301–8305). Like virtually all electronics, our displays do contain components sourced from around the world, however we always try to source from American companies whenever possible. We bring these components to the United States, where we build our displays (“substantially transform” is the legal term).
